**Hiring Team**
 Dexter Health

Dear Dexter Health Team,

I'm excited to apply for the Senior Flutter Developer position at Dexter Health. With five years of experience in software engineering, including mobile development across both freelance and in-house roles, I've developed a passion for building smart, scalable apps that make a real impact. Your mission to empower nurses and transform healthcare resonates deeply with me, and I'd be honored to contribute to that vision.

Throughout my career, I've been driven by curiosity and a desire to stay at the forefront of technology. In recent years, I've specialized in Flutter and Android development, building robust and intuitive applications that prioritize user experience. I'm currently exploring the integration of AI microservices into mobile platforms, something I see as closely aligned with your work on Dexter Mobile. This interest has also inspired me to pursue a master's degree in Artificial Intelligence to further enhance my skill set and contribute even more meaningfully to future tech-driven solutions.

What draws me most to Dexter Health is your unique blend of innovation and compassion. The opportunity to lead projects end-to-end while collaborating with a diverse, mission-driven team is exactly the kind of environment I thrive in. I believe my strong technical foundation, collaborative mindset, and passion for using technology to solve complex real-world problems make me a strong fit for your team.

Thank you for considering my application. I'm excited about the possibility of contributing to Dexter Health's bold mission and would welcome the chance to discuss how I can support your vision.

Warm regards,
**Johny Koudsi**
